AI-12 camera facing the driver

Enhanced 4G/LTE connectivity

Wi-Fi hotspot provides connectivity to IoT device and auxiliary cameras

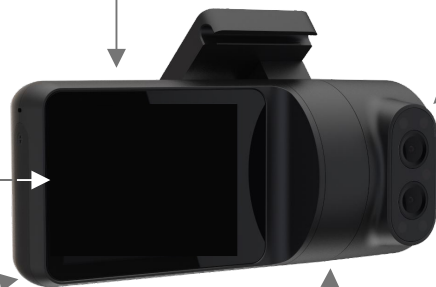

Touch screen enables a quick installation and easy troubleshooting

Built in GPS/ Accelerometer

Qualcomm® Snapdragon™ Octa-core Processor

AI detects distracted driving events and triggers video recordings

Built-in speaker for alerts and coaching in real-time

Rear or side auxiliary camera

- ✔ Install up to four auxiliary cameras at different spots per vehicle to enable tracking and video recording of additional perspectives during trips.
- ✔ Connect to IoT devices easily with the dashcam A-12's built-in wifi hotspot.
- ✔ The auxiliary cameras RAC-1 and SAC-1 record video only. They do not record audio at this time.

Cloud-based service

- ✔ Manage all of your vehicle's cameras from a secure dashboard in the cloud.
- ✔ Instantly access live video, events and recordings with a single click on an interactive map.
- ✔ View real-time vehicle GPS routing, details and history.
- ✔ Receive email alerts for driving incidents with event details and video.
- ✔ Define permissions and roles to control access to data and users.
- ✔ Retrieve video recordings from the dashboard without removing the SD card.
